

Case No. 3: Male, 3½-year-old Scottish Terrier

Background

Bruce is a 3-and-a-half-year-old, intact male Scottish Terrier. His owner, Manna Nelson, reports that her dog has had ear problems since he was a puppy. Bruce's owner has brought him to several different veterinarians in search of relief. The symptoms exhibited by the dog included dirty-looking ears and a bad odor, along with scratching at the ears.

Treatment with EcoEars for Dogs

After finding the prescription treatments from various veterinarians worked for her dog only temporarily, Ms. Nelson turned to EcoEars and is a strong advocate of the product, sharing these photos of her dog's ears before and after treatment:

Continued Results and Positive Prognosis

While Ms. Nelson shared that both the very affordable price of EcoEars and its natural ingredients are important to her, she mostly continues with the product due to its efficacy at keeping infections and smell at bay and continues to use EcoEars once every 10 days for maintenance cleaning.
